PRODUCT DESCRIPTION

The smart and sustainable solution to ensure your toilet is always fresh and clean – GROHE Fresh WC tabs.

Our 2-in-1 WC cistern tablet is designed to meet the highest standards of hygiene without compromising on environmental protection. The white descaler core effectively removes limescale in the cistern. The blue flushing substance provides long-lasting cleanliness by creating a purifying foam with each flush. Even inaccessible parts are reached and protected against (re-)soiling. Plus a subtle scent provides a permanent fragrance of freshness. Being an eco-conscious company, we have once again optimised our manufacturing process! The tablets are microplastic-free, phosphate-free, vegan and RSPO enabled, while the packaging is 90% recyclable and the cardboard is FSC-certified. For the easy insertion of the tabs into your GROHE flushing cistern with pneumatic flush valve we recommend our GROHE Fresh flush valve set (3879600 & 3879700). **CONTAINS HAZARDOUS SUBSTANCE!** Find more information here: www.grohe.com/safety-data-sheets/
